Glory Global Solutions is a World Expert in cash management, delivering technology and solutions that provide security, productivity and innovation to our customers. These solutions are supported by the technical expertise of GLORY Group of Japan, the pioneer in development and manufacture of money handling machines across the financial, retail, vending machine, amusement and gaming industries for nearly 100 years.

Across the world, Glory Global Solutions is trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity. 2,500 professionals, including over 1,300 service and support staff and 350 business partners cover over 128 countries delivering these solutions – wherever money moves.

Next generation vacuum banknote counter with variable counting speed and adjustable counting position.

GNH/GND-700 series
Banknote counting machine
Accuracy, the key to strapped banknote verification
GNH-700 & GND-700 Series are next generation vacuum-based banknote counters. With features such as variable counting speeds, easily adjustable count positions and a dust-proof, anti-noise shutter, the GNH/GND-700 Series offers the fast and efficient verification of strapped banknotes.

Variable counting speed
With selectable counting speeds of 1000/1500/2000/2400 pcs/min, at the highest speed selection, a 60% productivity increase is achieved over conventional models (1500 pcs/min.). At the lowest speed selection, the GNH/GND-700 Series is 33% slower than conventional models, making it ideal for counting poor quality banknotes.

Easily adjustable counting positions
A new Adjustment Knob locates the best counting position, and minimises mis-counting of banknotes with pinholes or folded-corners.

Dust-Proof and Anti-Noise Shutter
The GNH-700 and GND-700 are equipped with dust-proof and anti-noise shutters, which open and close automatically on the start and stop of each counting operation.

Simple and viewable operation panel
The LED display on the compactly designed operation panel, ensures clear and easy viewing, indicating the number of counted banknotes with 4 digits, and batch numbers with 3 digits simultaneously.
