

## Satellite Terminals

# i2200

Combining reliability with ease-of-integration, the i2200 cheque reader/printer is one of the fastest on the market. When connected to a payment terminal or cash register it reads and prints cheques in under 3 seconds and offers a wide choice of features ranging from access to anti-fraud authentication services and cheque processing centres, to adapting the method used to read the cheque according to its material condition, in turn guaranteeing a print-out of exceptional quality. In common with the latest generation of Ingenico Satellite terminals, it is compatible with our entire range of solutions and can be easily integrated to support any existing POS terminal investments. The i2200 is a high-performance solution ensuring fast and extremely reliable transactions.

The Ingenico logo, featuring the word 'ingenico' in a white, lowercase, sans-serif font inside a red oval.

## Security

The i2200 has the benefit of Ingenico's world-wide acclaim with regards to security and reliability. When connected to a payment terminal or computer system, it assures optimum anti-fraud prevention, offering access to all cheque databases, to both authentication and clearing services. It guarantees the utmost security for consumer and merchant alike.

## Performance

The i2200 combines speed and reliability. Reading and printing the cheque in less than 3 seconds, it automatically adapts the reading method it uses according to the material condition of the cheque, ensuring that all the information is securely transmitted. With its latest generation inkjet printer cartridge, this cheque reader-printer delivers optimum results with a non-run ink and its indicators warn when a replacement cartridge is needed.

## Design/Ergonomics

With its compact and elegant design, the i2200 fits comfortably into any POS environment. Its refined ergonomics and control indicators ensure ease-of-use, guiding you effortlessly through the payment process.

## Communication

The i2200 boasts both a USB port and two RS232 connections, ensuring smooth integration to support all POS payment systems ranging from cash registers to payment terminals and computer systems. Its high-performance, downloadable analysis feature performs magnetic head calibration and photocell adjustments, speeding up the maintenance process.

## Field Services

To reduce total cost of ownership and enable merchants and banks to maximise their terminal investments, Ingenico provides a comprehensive range of terminal and software update and management services, both remotely and in the field. Fully certified professionals and local language helpdesk personnel operate in every one of our regions, ensuring Ingenico is on hand to support customers 24 hours a day, 7 days a week, 365 days of the year.
