

TCD Benchmark Series^{®*}

Teller cash dispenser

Fast, automated and secure withdrawal of banknotes at the teller position

The optimisation of cash management calls for specialist experience, resources and truly innovative technology. Across the world, Talaris' cash management solutions are trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity.

Talaris have in excess of 250 patents granted across 26 countries and are world experts in optimal cash handling solutions. 2,300 Talaris professionals, including over 1,000 service and support staff and 130 business partners cover over 100 countries delivering these solutions - wherever money moves.

The Talaris Benchmark Series Teller Cash Dispenser (TCD) provides fast and accurate banknote dispensing. System control of withdrawals makes the transaction automatic and secure. With the addition of a convenient manual drop deposit facility, the cash dispenser delivers faster customer service and greater teller productivity.

Fast, accurate, efficient processing

The TCD dispenses up to 15 banknotes per second and can be shared by two or more tellers for maximum operational flexibility. It can also supply real-time balances by denomination, customer or teller, to facilitate the optimisation of cash handling and processing.

Secure cash handling

The TCD provides secure cash handling in open plan environments as the banknotes are stored within a steel cabinet.

Flexible design

The TCD will suit most branch sizes and environments as it is available in both seated and standing versions and with 4, 5 or 6 banknote cassettes.

Improved productivity

Reduced transaction times mean that the teller can focus on customer service and cross-selling high margin products instead of processing transactions manually.

	9210			9220	9250
