PRODUCT SHEET

Kaixun KX-086B

Desktop banknote inspection

The KX-086B gives cash-handling staff several ways to inspect banknotes at a counter. Operators compare the features they see with the expected features for the denomination.

Key details

Ultraviolet	Illumination helps staff inspect fluorescent security features.
Magnetic check	The manufacturer lists magnetic feature detection.
Watermark viewing	A lit viewing area supports visual comparison of watermarks.
Magnification	Built-in 3x and 12x magnifiers support inspection of fine print and small details.

Before you specify

Confirm the electrical version and exact lamp configuration for the unit being supplied.
