TC-5500 - *Vacuum Banknote Counter*

Tay-Chian TC-5500 vacuum banknote counter series offers the fast and efficient verification of strapped banknotes. With excellent counting accuracy and optional UV detection, TC-5500 Series is the best solution for counting poor quality banknotes.

Endurable and Great Performance
- With the speed of 1500 notes per minute, TC-5500 series is much more suitable for the heavy counting work.

Optional Detecting Function
- UV detection can check suspected banknotes during counting process.

Special Design for Higher Accuracy
- TC-5500 series is the best solution for counting poor quality banknotes.

Clear and User-Friendly Operation Panel
- LED display on the compactly designed operation panel, ensures clear viewing.

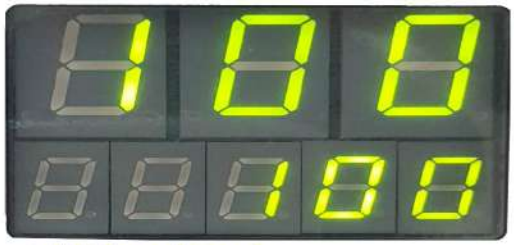

Stable and Smooth Counting Process
- With high quality spare parts of Taiwan origin, TC-5500 series provides a non-stop counting process for the users.

Variable Counting Modes and Optional Devices
- TC-5500 series offers more choices for the users when counting.

Specification
