PRODUCT SHEET

Vacuumatic Count-S 450MC / 450C

Non-contact optical stack counting

The Count-S 450 counts stacked cards, plastics and board by scanning the exposed edge. The camera reads the stack without touching the material. It can be used as a standalone counting station or integrated into a production line.

Key details

450MC camera	Monochrome GigE camera. Vacuumatic identifies this model as the successor to the 450B.
450C camera	Colour GigE camera for a wider range of materials.
Typical materials	ID and payment cards, plastics and heavy packaging. Test the actual material before specifying a system.
Operation	Colour touchscreen. Vacuumatic reports counts within seconds, depending on material and setup.
Options	Enhanced Teach is available for materials requiring special setup and remote assistance.

Before you specify

Provide samples of the intended materials and confirm how the system will fit into the existing line.
